### Current affiliations

Professor and group leader

Analytical Chemistry (including its application in forensic science)  
University of Amsterdam

Editor

Journal of Chromatography A (including electrophoresis, mass spectrometry and other separation and detection methods), Published by Elsevier Science

Director of Education

COAST (Comprehensive Analytical Science and Technology)  
Dutch public-private collaborative organization for analytical chemistry

### Biography

Peter Schoenmakers is professor of Analytical Chemistry at the University of Amsterdam. He investigates analytical separations, focussing on multi-dimensional liquid chromatography. He studied in Delft, The Netherlands (with Professor Leo de Galan) and in Boston, MA (with Professor Barry Karger). Thereafter, he worked for Philips in Eindhoven (The Netherlands) and for Shell in Amsterdam and in Houston, TX. He was awarded the AJP Martin Medal in 2011, the John Knox medal in 2014, and the Csaba Horváth Award and the CASSS award in 2015. In 2016 he obtained an Advanced Grant for Excellent Research from the European Research Council.
